

# **A Novel Method for Handwritten Digit Recognition System**

## **List of Problem Statements**

1. The postman needs a way to interpret handwritten postal address so that he delivers letters to the correct addresses.
2. The banker needs a way to understand handwritten bank cheques so that the right amount can be transferred to the right party.
3. Authorities need a way to verify signatures to validate certain documents.
4. Historians and writers need a way to interpret old handwritten papers and letters so that they can learn more about what happened in the past.
